

## More than just a Display

## More than 29 Years HYUNDAI

In 1986 the production of the first HYUNDAI display – a 12" monochrome CRT monitor – started. Since that time display technology has been developed enormously. And so did HYUNDAI and the brand name HYUNDAI has been synonymous with the design and production of state-of-the-art display technologies. Advanced devices offering sophisticated design and supreme image quality – with "built-in" future-proofing.

## More than just a Display!

Hyundai has 29 years experience in display development and innovative display solutions. Based on a smart and reliable product design we are offering a load of optional features that makes our product features suitable for any use case of today's business. That's how we bring add-on values and satisfy our customers. That's what makes us more than just display.

- Metal Frame Housing
- DOOH Media Panel
- Wide Viewing Angle
- High Brightness/Contrast
- Full-HD/HD-Ready
- Portrait/Landscape Orientation
- Integrated Video Wall Function
- High Connectivity
- Auto-Cooling System
- Remote Control + Monitoring
- VESA Wallmounting
- Auto Power Control (DPMS)
- Speaker-Ready

## Ensure Stable Operations in Any Environment

HYUNDAI's outdoor displays represent state-of-the-art display technology for any outdoor environment. Even strong sunlight, snowstorm and rainstorm can't stop HYUNDAI Outdoor Digital Signage from displaying messages and images with full function operating. By meeting highest industrial standards, they provide a high degree of operational reliability and superior image quality.

### All-Weather Capable Display

Fitted with an intelligent cooling and heating system, the outdoor displays are well prepared for standing any weather conditions. And a smart air looping system to protect the LCD Panel against so called black-outs.

(Black areas on the screen in the wake of overheating)

### Improve Readability

A special anti-reflection treatment reduces reflections on the display's surface.

### Vandalism Protection

Thanks to a special tempered security glass HYUNDAI's outdoor displays are well protected against any vandalism attacks.

### Auto-Brightness Sensor

Adjusts the panels brightness automatically according to the ambient lightning conditions. This reduces power consumption and increase the panel's lifetime.

### Motion Sensor (Option)

Depending on the detection of human motion in front of the screen, the display is either switched to operation or stand-by mode. This reduces power consumption and increase the panel's lifetime.

### Easy to Install and Service

Experience easy operating and maintenance with Hyundai's outdoor displays adopting front open access.

Along with the included mounting frame which is optimized for H467M, customer can install the product more easily without any additional equipment.

Vandalism Protection

### Highlighting the Multi-Vision with ultra-narrow Bezel Video Wall Displays

Due to the built-in video wall function HYUNDAI's MultiVision Displays are dedicated to installations of multi-screen walls. For this reason no additional expensive equipment, like video split processors, is necessary.

### Daisy Chain Connection

In order to connect a multi display wall, the single units are linked by a Daisy Chain connection over HDMI, Component or the D-Sub interface. This implicates that just one display (master unit) needs a direct connection to the video source. The configuration of each display, regarding its individual ID and position in the matrix, can be easily set-up using the onscreen menu or the RS232C interface. The built-in video wall function allows flexible configuration and easy installation.

### Ultra Narrow Bezel Design

With an ultra narrow bezel design, HYUNDAI's MultiVision displays are dedicated to build video walls. Combined with the cutting edge function - which allows displaying the full picture content - the smart design of the HYUNDAI public displays ensures a maximum screen area with a minimum of viewable interruptions.

### High Resolution

HYUNDAI public displays can display high-resolution and more data information on the LCD screen by an aspect ratio of 16:9. The Full-HD resolution enables brighter and sharper images when HD graphics and videos are display.

### Draw your customers attention!

HYUNDAI window displays are the best solution to attract the attention of audience. High brightness and contrast provide a superior image even in direct sunlight.

### High Temperature Tolerance

HYUNDAI's new window display is ready to operate in temperature of up to 105°C on its LCD surface. This prevents the "blackouts", caused by overheating, and makes it suitable for installation sites which are characterized by high temperature and bright ambience or direct sun light.

### LED Backlight

By switching the CCFL backlight into LED backlight ensure clear brightness for optimal visibility even in direct sunlight.

### Auto-Brightness Sensor

Adjusts the panels brightness automatically according to the ambient lighting conditions. This reduces power consumption and increase the panel's lifetime.

### Improve Readability

A special "anti-reflection treatment", it improves readability.

### Motion Sensor (Option)

Depending on the detection of human motion in front of the screen, the display is either switched to operation or stand-by mode. This reduces power consumption and increase the panel's lifetime.

### High Brightness & Contrast

Achieving a brightness from 450 to 2300 cd/m<sup>2</sup> and working with a smart dynamic contrast technology, the special Out-Of-Home panels ensure bright and sharp pictures with a facsimile depth, even in bright enlightened environments.

## Versatile Digital Signage Stand-Alone Display solutions with Product Design

HYUNDAI's Stand-Alone Displays are the best digital information solution using the LCD screens. Combining dynamic screen contents and the static depiction of corporate identity, it creates the maximum value in digital information.

### **Protective Housing**

In order to protect the high-tech components and ensure a long life time, the housing is fully made of steel and can be locked. The panel is protected by a special tempered glass.

### **Touch Screen Function (Option)**

Optionally, the Stand-Alone Displays are available as touch screen models. The used infrared touch screen technology ensures maximum controlling comfort and makes them ready for a lot of interactive applications.

## Environmental Friendly & Slim Design

With a series of ecological features HYUNDAI is on target to provide environment-friendly products which reduce power consumption, especially when it comes to permanent operations of digital signage installations.

### Low Power with LED Backlight

HYUNDAI's public displays with LED backlight bring the advantage of an up to 40% lower power consumption, compared to displays with CCFL backlight.

### RoHS Compliant

With the compliance of the RoHS directive of the European Union, HYUNDAI guarantees that there are no hazardous substances used, which will pollute the environment after the product's life cycle.

### Slim & Light design

HYUNDAI's Slim LED public display is 70% thinner than CCFL back-light display.

Super-Slim Design

### Motion Sensor (Option)

For installation sites where contents only need to be displayed on demand (e.g. information terminals), motion sensor is suitable to reduce power consumption and extend the panel's life time. Thereby the motion sensor detects human motion inside a defined periphery around the display. If there is no motion detected, the display automatically switches to stand-by mode.

### Auto Brightness Sensor

An integrated light sensor that measures the ambient light takes care that panel's brightness will be adjusted to the ambient lighting conditions. As a result the power consumption will be reduced while the panel's lifetime will be increased.

### Attract Public Viewers with the Excellent Screen layouts and Optimized Design

HYUNDAI's public displays ensure the presentation of digital signage contents in a sharp, high bright and brilliant picture quality. These meet all technical requirements for professional display equipment and can be installed in any format such as portrait, landscape, single, multi and built-in delivering clear and bright images.

### Professional DOOH LCD Panel

Using commercial grade LCD panels for Digital Out-Of-Home applications the HYUNDAI public displays have a higher brightness and contrast than standard LCD TV panels. Also those panels enable permanent operation and deliver clear and bright images. They can be used in both portrait as well as landscape orientation without any losses of quality.

### Metal Frame Housing

A solid metal frame housing guarantees that the panels of HYUNDAI IT's public displays are well protected especially when it comes to public area installations. In addition, the metal frame gives the product a high quality and an appealingly optical appearance.

### High Definition Resolution

Having a resolution of either 1366 x 768 or 1920 x 1080, HYUNDAI public displays can display high-resolution and more data information on the LCD screen by an aspect ratio of 16:9. The Full-HD resolution enables brighter and sharper images if HD graphics and videos can display.

### Various Connectivity

Providing an array of various professional input and output connectors [HDMI, DVI, Component/Composite (BNC), VGA] HYUNDAI Digital Signage afford an easy, flexible and multiple connection to a broad range of external A/V devices.

### Wide Viewing Angle

The wider the panel's viewing angle is the more viewers are able to see the contents in a high quality. That matters for both meeting environments as well as public area installations. Coping with a wide viewing angle of 178°(H/V) HYUNDAI public displays bring the content to the entire audience.

Conventional Display

Hyundai

### Various Connectivity

Providing an array of various professional input and output connectors [HDMI, DVI, Component/Composite (BNC), VGA] HYUNDAI Digital Signage afford an easy, flexible and multiple connection to a broad range of external A/V devices.

### Touch Screen

As an option, HYUNDAI public displays can be equipped with touch screen functionality.

## An intuitively Easy Interactive Board Solution

Our Interactive board - displays, software, services and support all work together - giving you the tools to share information and ideas in visual and interactive way. With a Interactive board, your resources are at your fingertips - whether you're in a meeting room, an R&D lab or the dealer shop.

### **Design Engineering**

HYUNDAI INTERACTIVE BOARD solutions make it easy to review project materials and work with other resources on a large interactive surface. You share information visually, whether your teams are local or dispersed.

### **Business Process Management**

HYUNDAI INTERACTIVE BOARD solutions can help stakeholders and process owners collaborate to support agile development principles -from definition and analysis to activity mapping, improvement targets and ongoing measurement.

### **Product development**

With HYUNDAI INTERACTIVE BOARD solutions, you can bring experts together in one room, regardless of location. You can work with file and applications on a large interactive and contribute to the work in real time.

### **Optical Touch Technology**

Camera based optical technology applied. So it is stronger, quicker and more reliable compared with other technologies. Connect it to a desktop, double-click a program with a stick, enjoy surfing the internet with a pointer and play simple games with user's own finger.

### **Reliable Durability**

Life span on LCD panel comes to approximately 50,000 hours (about 17 year) when used 8 hours a day.

### **Easy and Fast Operation with Hot Key**

With the software hot key, even the neophytes can operate easily and teach classes quickly.
