BOOKSHELF

Designed by Hans Thyge & Co. // Produced by PJ Production

BOOKSHELF

This modern bookshelf is challenging the classic way in which books and magazines are normally stored. However, it is not only magazines that can be stored in the bookshelf, but also books, maps, and even laptops can be placed at the shelf.

The bookshelf can easily be mounted on the preferable surface with one single clamp, supporting the flexibility of the collection. Meaning, regardless of the purpose being a storage solution for current tasks during work, eye-catching magazine holder at the entrance, or something differently, this is definitely a great solution to choose.

The design of the shelf is floating horizontally with the surface of the table. This is mainly due to the graphical placement of the shelf combined with the shelf being below and away from the surface of the table.

The horizontal shelf is preferable for things like keys, purse, phone, or other smaller objects. Furthermore, the graphical distance between the shelf and the table makes the cleaning of the table much easier.

MULTI CLAMP

Designed by Hans Thyge & Co. // Produced by PJ Production

MULTI CLAMP

The entire APTO collection is built upon a design-protected multi clamp, where modern shapes and simple functionality, in combination, have been the bearing elements.

The multi clamp can easily be mounted to the preferred horizontal surface within seconds, as long as the phased edge is not more than 27 mm. The multi clamp can easily be relocated from one surface to another, while the remaining objects can be installed in the multi clamp, - effortlessly, silently, and steadily.

The collection is the outcome of a visionary dialogue, in which circularity within the changing working environment has been the agenda. Due to the growing consumerism worldwide, we are forced to incorporate longevity and circularity. This design-protected multi clamp is providing the opportunity of changing, modifying, and personalising the individually working environment with space optimisation in mind.

The multi clamp has gotten the design-protection based on the modern and elegant shapes, simple functionality, and timelessness, which means that this is a product to be.
