MONITOR HOLDER

Tailoring the working space to be economically friendly is essential in order to avoid working-related injuries. This issue is exactly what this monitor system would like to solve by comfortability and availability. The monitor holder can easily be mounted at the preferred surface with one single clamp. The combination between the size of the monitor system and the mounting does that the monitor holder is recommendable for the smaller offices, - including home offices. Besides the optimization of space, the discreet size of the monitor holder makes it possible to have two monitor holders side by side.

The design of the monitor holder makes it possible to use it with one of the cable managements from the same collection. The APTO collection is designed with modern, elegant shapes, which equally can be seen at the design of this monitor holder. Especially the sophisticated brass detail at the multi clamp is consisting at the design of the monitor holder. Meaning, the two products are melted together as one united product when mounting the monitor holder in the multi clamp.
