

**Even more comfort with the Circle80.**

The Circle80 is now available with a 15 W induction charger integrated in the lid.

The charging process with the Circle80 DisQ works both closed and open. In this way, the well-known functions of the Circle80 can continue to be used..

**Circle80 Hide**

Another comfort addition is the Circle80 Hide, the cover without charging function elegantly covers the connections. That's just how they become visible if necessary.

Available with internationally approved sockets.

# EVoline® Circle80 DisQ

NEW

The Circle80 DisQ fits into the existing module opening. So every Circle80 can be easily retrofitted. Please lay the smartphone flat for charging. Smartphones with a magnetic ring are optimally fixed. A separate plug-in power supply with USB-C connection is required for the function.
