

## MonLines

# Accessories 2nd monitor partition for MTC Cases

## Description

With the MonLines MTC107 partition as an accessory, 2 monitors can be transported in the flight case without damaging each other. By using an additional flightcase partition, 2 monitors can be safely stowed in the case. At events, trade fairs, concerts, festivals, conferences or in clubs and discotheques, the transport case offers optimum protection against transport damage. The Made in Germany flight cases are manufactured by precise handwork. Different models such as bonnet cases, chest cases, flight cases or even rack cases can be individually designed.

## Key features
