

## MonLines MBS016W

### Mobile electric monitor stand with shelf up to 98"

#### Description

The MonLines MBS016W mobile electric monitor stand, height adjustable, is suitable for TV screens and touch displays up to 98 inches. Thanks to the electric height adjustment in the sense of a TV lift system, the screen can be adjusted to the different needs of different body heights in order to work comfortably and ergonomically on the touch screen or to adjust the ideal height for the TV set. Equipped with a cable retractor box, the motorized TV cart is suitable for use in offices, educational institutions and the hospitality industry and offers versatile solutions for all users who want to use screens for presentations, video conferences. The two powerful motors have a load capacity of 120 kg for TVs up to 98 inches. Another highlight are the two height-adjustable shelves for camera and AV equipment.
