

MonLines MDH012W

Electric built-in TV ceiling lift 32 - 75 inch

Description

The electric TV ceiling mount from MonLines (MDH012W) can be easily adjusted to individual requirements thanks to a tilt angle of 107°. The TV experience can be enjoyed in any position, whether standing, sitting or lying down. When not in use, the TV is simply lowered flat into the ceiling and stowed away to save space. The foldable TV ceiling lift disappears discreetly behind the monitor and remains practically invisible.

Thanks to its 50 kg load capacity, the built-in lift offers reliable safety for screens of up to 75 inches. It can be controlled using a switch, the remote control supplied or via the RS232 interface. In addition to the living room at home, ideal areas of application include conference rooms, lounges, universities, schools and conference centers. The screen can be folded out from the ceiling at any time and is suitable for home cinemas as well as for presentations, training purposes or workshops.

Key features
