

MonLines myTVLift MLS005B & MLS006B Electric built-in TV lift

Description

The motorised TV installation lift MLS offers the convenience of making the TV vanish seamlessly into furniture, such as a sideboard, with a simple button press. The MonLines monitor mount can accommodate screens ranging from 32 to 48 inches (MLS005B) or 37 to 65 inches (MLS006B), weighing up to 50 kg. Employing a remote control, the TV can be effortlessly extended from within the furniture, and this remote control is furnished with a position memory function that enables the saving of preferred positions. The TV lift MLS features an anti-collision function that automatically halts its operation if an obstruction is detected. This makes it suitable for various applications, including home living rooms, trade shows, conference rooms, meeting spaces, educational institutions such as schools and universities, as well as congress and conference centres. With the aid of the integrated lift mechanism, the monitor can be discreetly and elegantly extended and manipulated using the remote control. This integration renders the monitor seamlessly part of the furniture, making it an excellent choice for presentations, training sessions, or workshops.
