

## MonLines myTVLift MLS005B & MLS006B

### Electric built-in TV lift

### Description

The MonLines MLS030B TV lift for 2 monitors provides a convenient solution for video conferences and presentations, ideal for meeting rooms or lobbies. The integrated monitor lift is electrically adjustable in height by 640 mm at the press of a button and accommodates 2 monitors placed next to each other, each with a screen size of 32 inches or larger. With its space-efficient design, the dual TV lift is perfect for integrating into furniture and seamlessly complements various settings with its subtle anthracite finish. Utilizing a remote control, the TV can be easily extended from the furniture, while the position memory feature simplifies the saving of preferred positions. The MonLines MLS030B electric dual TV lift also includes an anti-collision function, automatically halting if an obstruction is detected during extension. The dual monitor TV lift is well-suited for various settings such as living rooms, trade fairs, conference rooms, schools, universities, as well as congress or conference centers. The monitor can be smoothly extended and managed with subtlety and style through the remote control. Its integration into furniture via the built-in lift makes it an excellent choice for presentations, training sessions, or workshops.
