

## MonLines myTVLift MLS032B electric built-in TV lift

### Description

The motorized TV built-in lift MLS032B allows the television to disappear into furniture (such as a sideboard) at the push of a button. Screens measuring 37 to 80 inches and weighing up to 60 kg can be attached to the MonLines monitor mount. The television can be easily extended out of the piece of furniture using a remote control. The remote control is equipped with a position memory function that makes it possible to save favorite positions. Thanks to the anti-collision function, the TV Lift MLS stops automatically as soon as an obstacle is in the way when it is extended.

Ideal areas of use are in the living room, at trade fairs, in conference rooms and meeting rooms, in schools and universities, in congress centers or conference centers. The monitor can be extended and controlled discreetly and elegantly using the remote control. The monitor can be integrated into the piece of furniture using the built-in lift and is perfect for presentations, training purposes or workshops.
