

MonLines MLS034

control cable for TV lift MLS006B, MLS005B, MLS032B

Description

The MonLines SmartHome control cable MLS034 is an essential part of a modern, networked household. It enables the MonLines television lift to be connected and controlled with an existing or new SmartHome system. The TV lift can be conveniently operated with all SmartHome control devices. With the accessory control cable for MonLines TV lift systems strong> we offer a high quality and reliable cable that has been specially developed for controlling TV lifts. This TV lift cable allows for a smooth connection between the control unit and the TV lift motor, allowing the TV to be raised or lowered effortlessly and safely. The TV lift power cable is made of durable and robust materials that guarantee a long service life and stability. The control cable is ideal for motorized MonLines TV lift systems in living and office spaces as well as in conference rooms or home cinema systems. It provides a secure connection between the control box and the motor to ensure smooth movement of the TV.
