

## MonLines MMH002 Monitor truss mount up to 70 inches, tiltable

### Description

The MonLines MMH002 inclinable truss holder is suitable for monitors from 32 to 70 inches. For example, at trade fairs or events, the bracket can be attached to horizontal or vertical trusses with a diameter of 48-52 mm. The holder is particularly characterized by the simple installation thanks to the integrated spirit level. The truss pickups can be easily loosened and tightened using the wing screws.

The VESA struts are attached to the VESA mount on the back of the flat screen. So the TV can be easily hung. The struts can be adjusted laterally for optimal placement. The load capacity is max. 60 kg.

### Key features
