

MonLines MTH014B

Touchscreen desk mount 32 inch, height adjustable

Description

The flexible monitor table holder MonLines MTH014B in black is particularly suitable as a desk mount for touchscreens. With a load capacity of 8 kg, it provides stable support for screens with a diagonal of up to 32 inches. By means of a rotary control on the back, the monitor desk holder is height-adjustable by approx. 200 mm to adjust the viewing angle ergonomically ideal. In addition, the mount can be swiveled, tilted and rotated by 180°, so that the screen can be viewed in both landscape and portrait mode.

The mount can be attached to the table either with the included desk clamp or with a drill screw. Mounting the monitor is made easier by the removable VESA mount. The back of the column also has an integrated cable guide, which keeps the desk tidy.
