MonLines MTL FLYcase

Transport case with TV lift

Description

The robust MTL flight case with TV lift from MonLines is equipped with practical castors and can be stored safely and in a space-saving manner. The TV lift integrated into the transport case has a lifting height of 890 mm (49", 55" and 65") or 1000 mm (75"). With the aid of the remote control supplied, which has a range of up to 9 m (MTL004: 6 m), the screen mount can be conveniently extended and retracted. When the TV set is not in use, it is safely stored in the housing and the lift is parked. In addition, the remote control offers the possibility to store up to two preferred positions and recall them by simply pressing a button. An integrated anti-collision function provides additional safety during operation. When not in use, the lift disappears completely into the TV transport case, with the lid flush with the top. **MonLines** - For your individual & functional needs.

Key features
