

MonLines MUC001B USB configuration cable for USB Linak CBD6S

Description

The high-quality MonLines MUC001B USB configuration cable ensures simple and seamless control of MonLines TV lifts. Specifically designed for this purpose, the MonLines cable is the ideal solution for connecting the control unit to a MonLines TV lift, enabling full functionality of the Control Basic software. A reliable USB cable is essential for smooth communication between the TV lift and the control unit. This cable ensures that all settings and functions of the Control Basic software are correctly transmitted and executed. It allows for easy control of the height-adjustable TV lift and management of personalized settings such as height positions. Thanks to the simple plug-and-play connection, no complex installation is required – just plug the USB cable into the control unit, and the connection is instantly established. The Control Basic software automatically recognizes the connection. With reliable and fast data transmission, all settings are transferred to the control unit accurately and without delay, ensuring responsive and precise control of the electric lift.
