

MonLines mySwing MSM12 electric TV wall mount up to 75 inch

Description

Televisions with a screen diagonal of up to 75 inch and a maximum weight of 40 kg can be mounted on the electric TV wall mount with WLAN from MonLines. For optimum adjustment of the individual viewing angle, it can be swiveled 90° to the left or right and tilted manually by +/- 7 degrees. When fully retracted, the distance to the wall is only 82 mm. No additional remote control is required for control, as the TV wall bracket is compatible with the existing TV remote control. A preferred angle can also be programmed on the remote control, which can be recalled later at the touch of a button. Built-in collision protection protects the motorized TV wall holder from any damage. Alternatively, the mySwing MSM12 mount can also be used via smartphone or smart home voice assistants such as Amazon Alexa and Google Home thanks to the Wi-Fi adapter supplied. To use the control function, simply download the free wBox app from Google Play or the App Store.

Key features
