

MonLines SBH002 soundbar mount universal, black

Description

The MonLines SBH002 versatile TV soundbar mount is the ideal solution for any home cinema setup. It is compatible with a wide range of soundbars with a depth of 8.6 to 15.5 cm. The soundbar holder is compatible with most soundbar models. It also fits perfectly with televisions with a VESA standard of up to 800x400 mm. The flexibility of the bracket makes it possible to mount the soundbar both above and below the TV, depending on your preferences for an optimal sound experience. In addition, the soundbar bracket offers a practical alternative to wall mounting by attaching it directly to the TV without the need for mounting holes in the wall. Thanks to the positioning, the soundbar automatically rotates in the same direction as the TV for a synchronised sound experience. If required, the bracket can also be fixed to the wall.
