

MonLines MSH007

Slatwall monitor arm for MSH with pivot function

Description

The MonLines MSH007 is a tiltable and swivelling monitor holder for slatwalls that can easily be hooked into a groove of the organisation rail and repositioned along it without any problems. In addition to monitor holders, various accessories such as trays for documents can also be attached to the practical organisation wall.

The MSH007 slatwall monitor mount offers a 90° swivel range to the left and right and a 90° tilt angle upwards and downwards. In addition, the monitor mount has a 90° rotation function (pivot) so that the display can be easily rotated from landscape to portrait format and back again. The integrated gas pressure spring supports the repositioning of even heavy monitors weighing up to 9 kg.

Key features
