NOVUS more space system

**NOVUS**<sup>®</sup>

## Tracking down innovations: With expertise in individually tailored retail solutions.

Since the company was founded in 1949, the Novus brand has been synonymous with:

- innovative technology,
- sophisticated „German Engineering“,
- modular systems
- and high quality.

These attributes provide the basis for the modular NOVUS more space system as the key to creating secure and appealing retail solutions that are tailored to your needs with its versatile, flexible elements. It is precisely this individuality that is needed at the point of sale with its many and varied demands.

Our space-saving flexible products integrate perfectly into the shop's design and enhance user friendliness at the point of sale with cleverly designed details. Every day our engineers are busy working on new solutions at the Research and Development Centre at company headquarters in Lingen, Germany. We use advanced technology in our company's own production facilities to ensure the high quality of our products.

Let our expertise benefit your business: Novus boosts efficiency the systematic way.

The emco Group's R&D centre in Lingen, Germany

The right concept for any need – every option an asset.

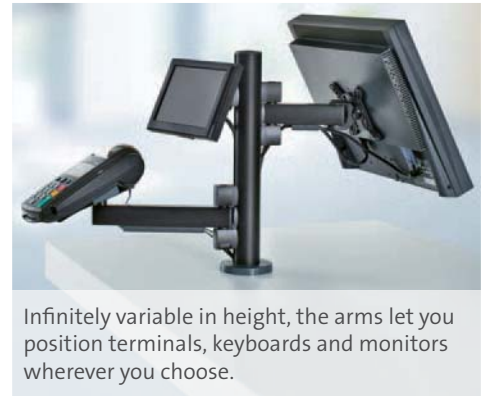

Knowing what matters to you: our RetailSystem in detail.

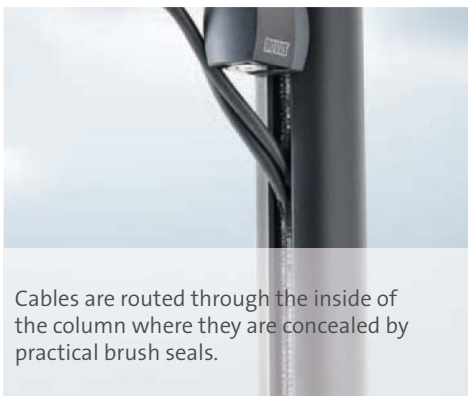

2 in 1: Screw-on and through-table attachment for using existing cable ports.

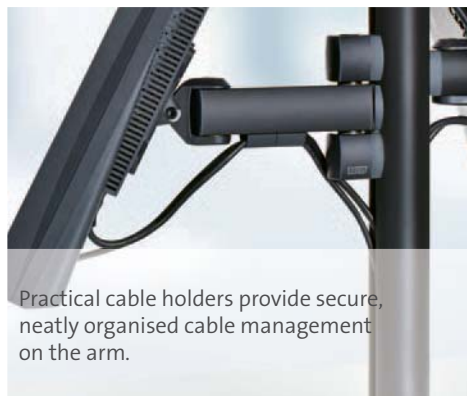

High-quality silver- or black anodised aluminium profiles.

Infinitely variable in height, the arms let you position terminals, keyboards and monitors wherever you choose.

Cables are routed through the inside of the column where they are concealed by practical brush seals.

Practical cable holders provide secure, neatly organised cable management on the arm.

The standard mount adapter takes all of the effort out of attaching any monitor conforming to the 75 x 75 mm or 100 x 100 mm attachment standard. Attachment can be made with QuickRelease.

# The NOVUS RetailSystem

Everything in its place. Everything in view.

Product	 anthracite	 silver
