PC MODULE

## The built-in all-rounder

The Predia PC module is a built-in computer in your touchscreen and offers the user great convenience. It is no longer necessary to connect the touchscreen to a separate computer. The Predia PC module turns a Predia Touchscreen into a complete interactive solution.

### No cables

The Predia PC module is integrated into the Predia touchscreen, so no cables are needed to connect the display to an external computer.

### Excellent specs

The Predia PC module features a powerful Gen 11 Intel processor, only A-brand components, USB-C connection, SSD storage and Ultra HD graphics card.

### With convenient HDMI-out

The Predia PC module is equipped with a convenient HDMI output that makes, for example, an HDMI splitter for a monitor on the desk unnecessary.
