

TabLines TBS009

Tablet floor stand with VESA tilt module

Description

TabLines lets your tablet stand freely in the room with this solid tablet floor stand with inclination TBS009 in black, stainless steel, silver or white. The tilting tablet stand in combination with the TSG tablet protective case is perfect for using any tablet in public places such as offices, shopping centers or trade fairs. Thanks to the integrated tilt module, the tablet can be tilted by 0-60° on the base so that the optimal viewing angle can always be set.

Please note: In order to mount a tablet on the floor stand, you also need a TabLines TSG tablet protective housing suitable for your tablet model, which is attached to the tilt module using the VESA mount of 100x100 mm. The TSG protective housing is not included in the scope of delivery.
