

## TabLines TTP

### Tablet table stand plug for all available tablets

## Specification

---

### Elegant design

The TabLines TTP tablet stand table plug for all tablets available on the market presents the tablet in a very minimalist way. Clear lines, an asymmetrical look, a high-quality powder coating and the milled aluminum material make the tablet holder a design object.

### Optimized as a table stand AND for flexible use

The tablet stand offers quick and easy insertion and removal and can take over the tablet when hands-free but the display needs to be clearly visible. The TabLines TTP tablet stand table impresses with its minimalist design and is a high-tech statement in the room. A visually compelling and durable product.

### Perfect for room control

By placing it on the table, the tablet is easily accessible and always ready. Light management, loudspeakers, TV sets, energy options and much more can be controlled and optimized with the right applications.

### Always have a charged tablet available

The iPad, Samsung Galaxy Tab, etc. are supplied with power via a pre-assembled cable with a USB-A plug thanks to the adapter that matches the tablet model. The USB A connection fits standard USB chargers as a power supply or in a connector panel. This means that it can also be used flexibly at the workplace, in offices and in meeting or conference rooms.
