

TabLines TTS041

Design tablet table stand, Apple iPad 9.7 (2018)

Description

TabLines TTS041 offers the ideal tablet stand solution for the Apple iPad 9.7 (2018) for all common WLAN-based home automation control systems. As part of a complete control solution, the Apple tablets offer a variety of practical and user-friendly applications, for example as an alternative to existing KNX switch programs.

With the tablet stand of TabLines TTS041, every tablet becomes an integrated, custom design touchmonitor for modern multiroom systems, home and commercial media technology, smart home, home entertainment and the control of intelligent building technology.
