Data sheet

TabLines TWE
Tablet wall-in solution for all available tablets
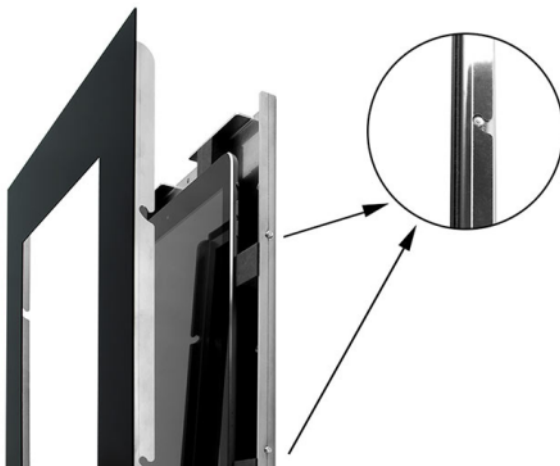

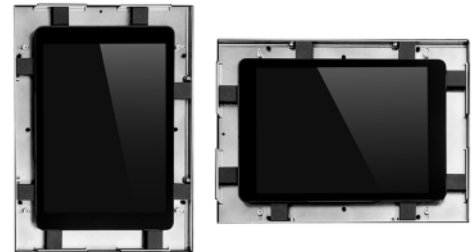

Description

Elegant design. The TabLines TWE tablet wall-in solution presents the tablet in a very elegant way. Clean lines, a gentle but present look and a high-quality powder coating make the tablet wall mount to an enrichment for every place where content is presented.

Optimized for public use. Due to the high quality materials of the mount, the TabLines TWE tablet wall-in solution is well suited for operation in public areas. Depending on the variation, the mount is made of powder-coated, solid steel or real wood oak. The wall mount is suitable for all tablets on the market (for example Apple, Samsung or Amazon Fire). The Tablines TWE tablet wall mount impresses with its minimalist design and is a high-tech statement in the room. A visually convincing and durable product.

Use in all areas possible. The TabLines TWE tablet wall-in solution turns the tablet into a control and entertainment all-rounder. The tablet mount is suitable as an integrated design touchmonitor for modern multiroom systems, private and commercial media technology, smart home, home entertainment or for the control of intelligent building technology.The uses are varied. In public areas the tablet mount can be used for example in universities or colleges as a digital notice board, in museums and galleries as a multilingual exhibition opportunity or in shops as a relief for employees to check the current warehouse stock, prices etc. in time.
