

TabLines TWH

Tablet wall mount for all available tablets

Description

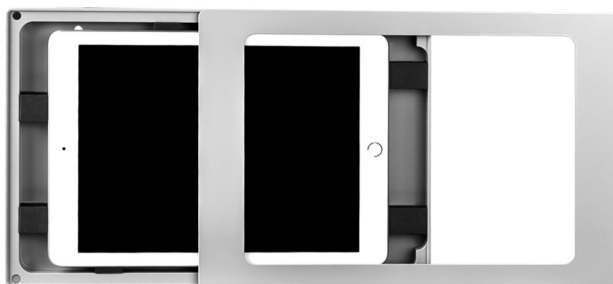

Elegant design. The TabLines TWH wall mount stages tablets in a very elegant way. The tablet mount is made of aluminum with a high quality powder coating. The tablet holder captivates with a minimalistic design which is a high-tech statement in every room.

Using tablets as a smart home control panel. Tablets can be used as SmartHome control panels in many areas. Controlling the vacuum cleaner or lawnmower robot, the hi-fi system, the television, optimizing the power consumption or managing the lightning which allows efficient light management - there are no limits to the application possibilities.

Easy handling. A major advantage of the TabLines mount tablet holder is the feature that the tablet can be removed at any time without tools. The TWH mount is suitable for all purposes where the tablet needs to be removed and inserted back quickly again. The housing will be fixed to the wall by 4 screws. Optionally with the help of the TeLines TNT004 a permanent power supply can be installed in the wall which supplies the tablet with power continuously. A strong magnet keeps the frame and the case together. The TWH is a perfect tablet mount for realizing a practical building control.
