

TecLines TPH001

Under desk PC holder 80 - 220 mm

Description

The TecLines TPH001 PC holder creates more space on the work surface / desktop because the PC is fixed directly under the desk. This way the PC is protected against dust, dirt and theft. In addition, the workplace can be cleaned more easily. The PC under desk mount can be adapted to many computer case sizes. It can be adjusted in height and also in width, so that the holder is a stable and modern mounting solution for almost every computer. The CPU holder has pre-drilled holes, which makes variable and simple mounting possible. Basically, the upper part of the computer holder is screwed to the underside of the tabletop. However, it can also be attached to vertical surfaces. After installation on the desktop, the height and width can still be flexibly varied. The width is determined by a top rail with a lockable mounting handle, and can be changed in seconds with just a flick of the wrist. TecLines - Intelligent technology by creative innovation.

Key features

Material:	Metal
Adjustability:	Width / height
Mounting:	Top rail with lockable mounting handle
Width:	85 - 220 mm
Height:	380 - 610 mm
Dimensions (WxHxD):	115 x 380 x 210 mm
Finish:	Black silver white
Model numbers:	TPH001B TPH001S TPH001W
