

## Product data sheet

# TecLines TKD002

## Desk cabel grommet 80-21 mm

### Description

The TecLines TKD002 desktop cable entry in titanium is perfect for a convenient desk cable outlet. Unsightly cables strewn about are now a thing of the past. With a straightforward desk hole of approximately 77 mm in diameter, this cable aperture can seamlessly integrate into any desk, complete with a black brush seal. The innovative locking mechanism of the TecLines TKD002 enables the lid with the brush seal to be rotated and securely fastened, providing the flexibility to route cables through the opening from any side. This practical cable management product finds diverse applications, including office workstations, meeting and conference rooms, and the sales counter to discreetly conceal cash register system cables. It's also well-suited for hotel receptions. TecLines - Intelligent technology by creative minds. (Example colour images: silver) .
