TecLines TKD006
Desktop cable port / grommet

Description

Most of electrical devices, such as table lamps, laptops, monitors or printers, can be found on the modern desk. Cable grommets are designed to allow cables and wiring to pass through a desktop safely. The sleek TecLines desk cable port in silver, black & white finish is a cable grommet system for cable management and enables almost invisible cable routing to the desk surface. Typical applications are office workstations, clubs, sales counters with cash register systems, meeting and conference rooms as well as hotel receptions.
