Data sheet

TecLines TKM003
USB-C 3.1 Keystone Modul

Description

Ingeniously simple connection: The USB-C 3.1 Keystone Module offers many improvements for today's USB standard.

Combination options: All sockets with Keystone modules, such as the Bachmann DESK2 sockets, can be equipped with the TecLines USB Type C connection. The USB-C Keystone module is practical in combination with a Keystone frame as a building block for custom module-enabled devices to charge smartphones, tablets and laptops at the desk without a lot of cable clutter.

Perfect for the office & for many other areas of use: The USB-C 3.1 module is a perfect match for custom module sockets at office desk workstations, in conference rooms, entrance areas, exhibition halls, in hotels or the private remote desk.
