

TecLines TKM008

Keystone module CAT6a RJ45 / angle, socket/socket

Description

The TecLines TKM008 Keystone Module CAT6a RJ45 / Angle, Socket/Socket a component for video and network connections. The RJ-45 connector is used to extend an RJ-45 connection. The signal is passed through 1 to 1 through. The connector supports a maximum transmission frequency of 500 Mhz. The design is very sleek and offers excellent shielding. To do this, connect a cable to both RJ-45 sockets of the TecLines TKM008 connector to both RJ-45 sockets. In many of the multiple sockets, which can be mounted in or on the table or on the wall, there are empty fields / empty panels. In these empty fields / support frames, the modules can be simply attached with a screwdriver and individually assembled as required. CUSTOM MODULES can be retrofitted or replaced quickly and with minimal effort.

Key features

Connections:	Cat. 6A RJ-45 socket to RJ-45 socket (90° degrees angled downwards)
Dimensions (HxWxD):	24.6 x 16.3 x 31.7 mm
Transmission frequency:	up to 500 MHz
Specification:	10 Gbit/s
Housing material:	Zinc alloy / cast zinc, nickel-plated
Weight:	0.022 kg
Finish:	Silver
