

TecLines TKM011W

Keystone module SAT F plug female socket/socket

Description

The TecLines TKM011W is a Keystone F-connector with socket on both sides of the module. This compact standardised snap-in module can be easily integrated into Keystone panels or junction boxes. The Keystone module SAT F-connector socket/socket adapter is also suitable for extending two cables. Many of the multiple sockets, which can be mounted in / on the table or the wall, contain empty panels / empty panels. The Keystone custom modules can be easily fixed into these empty fields / support frames with a screwdriver and assembled individually according to requirements. CUSTOM MODULES can be retrofitted or replaced with minimal effort. TecLines offers a wide selection of custom modules for video, audio and network connections for sockets and connection panels. These include VGA, HDMI, USB or RJ45 connections, which are simply installed in multiple socket strips with empty fields or carrier frames. The dimensions of the Keystone modules all follow a standard so that they can be mounted in the brackets provided for this purpose.
