

TecLines TKM016 Keystone CAT 6a RJ45 module

Description

The CAT 6a RJ45 Keystone Module (TKM016) can be easily installed by snapping it into a standard custom module frame to fill an unused position in a configurable socket or patch panel. This LAN connector, which has an RJ45 socket on both the front and rear, supports fast Ethernet connections of up to 10 Gbit/s according to the Cat.6a standard and is equipped with gold-plated contacts that comply with the TIA/EIA 568 standard. Possible areas of application include offices, meeting rooms, exhibition halls and hotels. TecLines - Intelligent technology by creative minds.

Key features

Front:	RJ45 jack
Rear:	RJ45 jack
Power class:	CAT.6a (backward compatible with CAT.6, CAT.5E and other categories)
Data transfer rate:	10 Gbit/s
Dimensions (WxHxD):	29,9 x 14,5 x 19,7 mm
Combinable:	With all Keystone-enabled custom module devices
Color:	Silver
