

## TecLines TKS002

### Cable guide set 100 cm with table attachment and base plate

## Description

TecLines TKS002 are the sustainable alternative to conventional cable guides. The innovative cable management system is made of food-safe, pollutant-free, insulating and 100% recyclable plastic.

TecLines created a cable management system that is at the cutting edge of technology and yet exudes a simple design. The TKS002 cable management system is available in three attractive colours: black, white and silver. A TKS002 cable guide set includes a table mounting for screwing on, as well as a base plate. The installation of the TecLines cable guide is very easy with this set. The 25 links of the cable coil result in a length of 100 cm and thus fit all standard desks. The cable guide offers space for up to 30 cables and has a tensile strength of at least 15 kg.
