

TecLines TKS003

Cable guide set 75 cm with table attachment and base plate

Description

TecLines TKS003 are the sustainable alternative to conventional cable guides. The innovative cable management system is made of food-safe, pollutant-free, insulating and 100% recyclable plastic.

TecLines created a cable management system that is at the cutting edge of technology and yet exudes a simple design. The TKS003 cable management system is available in three attractive colours: black, white and silver. A TKS003 cable guide set includes a table mounting for screwing on, as well as a base plate. The installation of the TecLines cable guide is very easy with this set. The 25 links of the cable coil result in a length of 75 cm and thus fit all standard desks. The cable guide offers space for up to 25 cables and has a tensile strength of at least 5 kg.
