TLH004 / TLH006 2x speaker stand height-adjustable for Sonos Era 100/300

Description

TecLines presents the Sonos Era speaker stand as the ideal solution for users who would like to avoid drilling holes in the wall. The speaker stand in a pack of two is specially designed for the Sonos Era 100 / 300 WLAN speakers and can be adjusted in height by 57 cm for an outstanding sound experience. Depending on the flooring, its robust base can be fitted with plastic feet or spikes for carpeted floors, which decouple the speaker from the floor and thus reduce vibrations and noise. The slim, unobtrusive design in black or white integrates seamlessly into a variety of room designs. The built-in cable guide elegantly conceals the speaker cable out of sight. Installation is quick and easy thanks to the installation material supplied.

Key features

Suitable for:	Sonos Era 100 (TLH004) / Sonos Era 300 (TLH006)
Number of stands:	2
Height-adjustable:	700 - 1270 mm
