

TecLines TNH002 laptop stand up to 17", height adjustable

Description

The laptop table stand from TecLines is an ergonomic solution for longer activities at the desk, whether in the office or when working from home. By means of a simple snap-in function at the push of a button, the height of the notebook holder can be adjusted in 16 steps by a total of approx. 15 cm. The laptop desk stand made of lightweight aluminum is suitable for models with a maximum screen size of 17" and has a load capacity of 5 kg. Non-slip pads hold the device securely on the storage surface. The fixed 15° tilt angle keeps the keyboard comfortably within reach. The open design of the laptop holder promotes free air circulation and thus prevents possible overheating. With the help of the enclosed installation material including assembly instructions, the assembly is done in no time.
