

TecLines TNH003 Laptop / Tablet mount

Description

The TecLines table stand for laptops and tablets can be easily adjusted in height with a single movement thanks to the integrated gas pressure spring. The laptop holder allows you to work flexibly while standing or sitting. The work surface can also be tilted by 45° so that the optimum ergonomic working position can be set quickly. The generous work surface offers sufficient space for various tablets, laptops and notebooks weighing up to 5 kg. A safety bar at the lower edge of the work surface prevents the device from slipping and ensures a secure hold.
