

## TecLines TPH002

### Under desk PC holder 30 - 110 mm

## Description

TecLines - Intelligent technology by creative innovation. The TecLines TPH002 under desk PC holder creates more space on the work surface / desk because the PC is attached directly under the desk. This way the PC is protected against dust, dirt and theft. In addition, the workstation can be cleaned more easily. The CPU / thin client holder can be adapted to many computer case sizes. It can be adjusted in height and also in width, so that the holder is a stable and modern mounting solution for almost every computer. The CPU holder has pre-drilled holes, which makes variable and simple mounting possible. Basically, the upper part of the computer holder is screwed to the underside of the tabletop. However, it can also be attached to vertical surfaces. After installation on the tabletop, the height and width can still be flexibly varied. The width is determined by a top rail with a lockable holder handle and can be changed in seconds with just one movement.

## Key features

Material:	Metal
Adjustability:	Width / height
Mounting:	Top rail with lockable mounting handle
Width:	30 - 110 mm
Height:	205 - 350 mm
Dimensions (WxHxD):	115 x 350 x 80 mm
Finish:	Black   silver   white
Model numbers:	TPH002B   TPH002S   TPH002W
