

TecLines TPH003B thin client / mini PC mount for VESA

Description

The mini PC VESA holder from TecLines (TPH003B) is suitable for thin clients as well as mini servers, hard drives or USB hubs with a maximum depth of 70 mm and a weight of up to 3 kg. The mounting of the thin client bracket can be done either as a free placement on the desk, via screw mounting on the VESA mount of a monitor bracket or directly on the monitor - unobtrusive and at the same time easy to reach. The infinitely and smoothly adjustable sliding mechanism allows the depth to be adjusted exactly to the respective device. Non-slip silicone pads ensure that no scratches can occur. Thanks to the included mounting material and instructions, the computer mount is quickly ready for use.
