

TecLines TQL001B

Qi wireless charger for furniture installation

Description

The wireless charger lies almost flat to the surface and is thus integrated into the environment. Installation is possible on table tops and other furniture tops with a thickness of 50 mm. The wireless Qi charger TecLines TQL001B is ideal for building into a desk, sideboard, chest of drawers or other furniture. The high-quality aluminum is particularly light and stable. Samsung smartphones are charged in the same way as Apple iPhones.
