

TecLines TVS006/007/008/009 retractable 3-way socket strip with cable

Description

The TecLines retractable 3-way power strip is designed for installation in desks, worktops or counters and can be pushed into the desk and pulled out when needed. On the TVS006 and TVS007 automatic models, the built-in socket outlet can even be fully automatically retracted or extended with a simple touch on the cover's switch icon. When extended, three earthed sockets (TVS008) and two USB-A sockets (TVS006/TVS007/TVS009) are revealed, which can be used as USB A/C chargers.

A special feature of the TVS006: when retracted, the lid can be used as an induction charger / Qi charger to charge Qi-enabled smartphones wirelessly. The installation of the retractable power strip is very simple. The TecLines TVS is inserted into a table cut-out and attached to the tabletop from below with a ring. A 2m power cable is integrated into the 3-way socket strip. Popular areas of use are offices, kitchens, conference and meeting rooms as well as in restaurants, at airports or at trade fairs.
